ANNUAL MEETING

April 11, 1968 — 11:00 a.m. (Toronto Time) Suite 1700 — 44 King Street West

DIRECTORS' REPORT TO THE SHAREHOLDERS

Four dividends of 4¢ each were paid in 1967 and a further 4¢ dividend has been declared payable March 1, 1968.

The tonnage and average grade of ore treated during the year and the value of gold recovered were almost the same as in 1966. However, production costs were higher due to the expenditure on shaft sinking and to higher wage rates and welfare costs as well as an increased assessment by the Workmen's Compensation Board. Lower taxes and higher E.G.M.A. credits were offsetting factors.

The year-end ore reserves are sufficient for about 18 months of production but include only ore above the 28th level. While there will probably be some additions to these reserves, it is obvious that the longer term depends on the results of development of the new deep levels and that this work must be done without delay.

The extension of the Emergency Gold Mining Assistance Act until the 1970 year end is a very helpful factor in rational forward planning.

An extraordinary profit of \$526,300 arising from the sale of a shareholding in Texas Gulf Sulphur has been excluded from net profit on operations and added to retained earnings.

Your Directors extend their appreciation of the loyal and able services rendered during the year by your Manager, Mr. Marshall, and his staff and employees.

On behalf of the Board,

Toronto, Ontario, January 30, 1968. R. V. PORRITT,
President.

AUDITORS' REPORT

We have examined the balance sheet of Hallnor Mines, Limited as at December 31, 1967 and the statements of operations and retained earnings and source and application of funds for the year then ended. Our examination included a general review of the accounting procedures and such tests of accounting records and other supporting evidence as we considered necessary in the circumstances.

The President and Directors:

This report summarizes operations for the year 1967.

MINE

Development

On the 27th (4150') level the drift on 19 Vein was extended 240 feet of which 90 feet was ore grade. A total length of 140 feet of ore has been confirmed.

No. 3 shaft was deepened 610 feet to establish four new levels at 150' intervals below the 28th (4300') level. Development of these new levels will begin in March 1968.

Diamond drilling totalled 26,890 feet in 174 holes comprising 9,990 feet for stope outline and control, 580 feet for hydraulic transfer of tailings backfill and 16,320 feet for exploration of lava formations on the lower levels. Intersections on 15 Vein below the 24th (3700') level indicated continuation down to the 26th (4000') level.

Development Summary

	Feet of	Advance
	1967	1966
Drifts and Crosscuts	1,510	3,300
Raises	750	1,160
Stope Preparation	6,260	5,950
Diamond Drilling	26,890	28,030
Shaft Sinking	610	-

Stoping

Ore broken in stopes amounted to 130,500 tons and 130,400 tons were trammed. The broken reserve at year end was approximately 13,900 tons. Tonnage hoisted in No. 3 shaft from below the 22nd (3350') level amounted to 79% of the total, compared with 71% in 1966.

The hydraulic fill system conveyed 44,700 tons of classified tailings from the mill to stopes below the 21st (3200') level. In addition, 1,500 tons of sand and 2,900 tons of development rock were placed for backfill.

The following tabulation lists production of ore by levels for the year 1967, and since production commenced in June 1936.

		Production — tons			
Level	Below Surface (Feet)	1967	Total 1936 to 1967		
1st to 8th 18th 19th 20th 21st 22nd 23rd 24th 25th 26th 27th 28th Stoping Total Development	1,400 2,750 2,900 3,050 3,200 3,350 3,500 3,700 3,850 4,000 4,150 4,300	18,095 1,670 6,450 — 955 18,450 28,560 20,020 30,770 1,890 3,535 130,395 2,935 133,330	2,578,115 27,305 248,210 128,090 40,605 13,915 60,845 118,870 66,545 98,920 1,890 3,535 3,386,845 238,500 3,625,345		

MILL

The mill operation was continuous throughout the year. The primary ball mill operated 98.1% of the possible running time and averaged 362 tons per day compared to 367 in 1966.

Ore treated was 132,170 tons averaging 0.40 oz. gold per ton. The recovery was 97.0% and production was 50,870 ounces of gold and 2,830 ounces of silver.

To December 31, 1967, the mill had treated 3,621,330 tons of ore yielding 1,422,240 fine ounces of gold and 104,710 ounces of silver, having a combined value of \$52,039,800.

19	68	1	967
Tons	Gold Oz./Ton	Tons	Gold Oz./Ton
21,900	0.23	21,800	0.21
174,100	0.23	253,100	0.24 0.44
199,000	0.40	286,000	0.41
	Tons 21,900 3,000 174,100	Tons Oz./Ton 21,900 0.23 3,000 0.23 174,100 0.42	Gold Tons Oz./Ton Tons 21,900 0.23 21,800 3,000 0.23 11,100 174,100 0.42 253,100

Allowance for normal dilution has been made in the above estimates. Mining widths in several stopes on 19 Vein below the 22nd level were narrower than anticipated and proven reserves were re-estimated accordingly.

GENERAL

I wish to express my appreciation to B. A. Thomson, Superintendent of Mines; D. P. Walli, Mine Superintendent, and his successor W. W. Holmes; J. K. Dever, Mill Superintendent; W. G. Howie, Chief Accountant and his successor G. D. Towers; R. Charron, Maintenance Supervisor, and their staffs, for the loyal and efficient service they have rendered during the past year. I also wish to thank the President, Directors and senior operating staff for their assistance.

Pamour, Ontario, January 15, 1968. Respectfully submitted, W. J. MARSHALL, Manager.
